# **Our Covid-19 Guideline Statement**

---

The health and safety of our patients, employees and families are of the utmost importance to us. **ProCare Staffing Solutions** is monitoring the ongoing coronavirus (COVID-19) outbreak and paying close attention to recommendations from local/federal officials and feedback on what we can do and how to handle this situation.

Based on recommendations to date, **Procare** will continue providing services to clients on their normal schedules. We are implementing additional precautionary measures to provide the safest environment for our patients, employees, and families.

We will continue to monitor developments around the spread of the coronavirus. As with all public health situations, we primarily rely on the Centers for Disease Control and Prevention and the Occupational Safety and Health Administration for the best information and preventive strategies.

If caregivers are experiencing any flu-like symptoms, we are asking them to notify **ProCare** Staff Coordinator, stay home, notify their physician for diagnosis and treatment, take care of themselves, and get medical clearance to return to work. Replacement caregivers will be offered to accommodate the patient's schedule.

If patients are experiencing flu-like symptoms, we are asking them to notify **ProCare**, and notify their physician for diagnosis and treatment, and provide **ProCare** notification from their physician that they are clear to have services resumed.

In the event that circumstances change, we will provide updates.

If you have any questions, please contact us.

Thank you and we appreciate you!

Sincerely,

ProCare Staffing Solutions
